## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, filed 2/4/2008, with respect claims 1, 4, 7, 8, 10, 13-15 have been fully considered and are persuasive.

### *Allowable Subject Matter*

2. Claims 1, 4, 7, 8, 10, 13-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record fails to teach or fairly suggest the combination of all limitations of claim 1 that includes **"said feature detection device divides said feature detection area into several areas, and conducts a feature detection in each divided area, respectively, wherein said white balance control device conducts the white balance control without using a result of a feature detection for an area which is not included in said zoom area when a mode which matches said zoom area and said feature detection area is selected, and conducts the white balance control with a result of a feature detection from all of the area photographed by said imaging device when a mode which does not match said zoom area and said feature detection area is selected, wherein the imaging apparatus further comprises: a weighing setup device to set an influence degree of the white balance control to data in each area within said feature detection area, wherein said weighing setup device sets equally a weighting for a**

**result of the feature detection in each of the areas, which are not included in said zoom area, and a weighing for a result of the feature detection in each of the areas within said zoom area when a macro mode or a portrait mode is used as a photographing mode; and wherein said white balance control device conducts the weighting to the result of the feature detection in said each area in accordance with the weighting set by said weighting setup device, and conducts the white balance control by use of said weighted result of the feature detection.”**

Regarding claim 7, the prior art of record also fails to teach or fairly suggest the combination of all limitations of claim 7 that includes **“a weighting setup device to set an influence degree for the white balance control to data in each area within said feature detection area, wherein said weighting setup device sets a weighting for a result of the feature detection in each of the areas, which are not included in said zoom area, lower than a weighting for a result of the feature detection in each of the areas within said zoom area if a light source of a high brightness is included in the result of the feature detection in each of the areas which are not included in said zoom area, and wherein said white balance control device conducts the weighting to the result of the feature detection in said each area in accordance with the weighting set by said weighting setup device, and conducts the white balance control by said weighted result of the feature detection.”**

Regarding claim 14, the prior art of record also fails to teach or fairly suggest the combination of all limitations of claim 14 that includes **“said feature detection device divides said feature detection area into several areas, and conducts a feature**

**detection in each divided area respectively; and wherein the imaging apparatus further comprises: a weighing setup device to set an influence degree of the white balance control to data in each area within said feature detection area, wherein said weighting setup device sets equally a weighting for a result of the feature detection in each of the areas, which are not included in said zoom area, and a weighing for a result of the feature detection in each of the areas within said zoom area when a macro mode or a portrait mode is used as a photographing mode; and wherein said white balance control device conducts the weighting to the result of the feature detection in said each area in accordance with the weighting set by said weighting setup device, and conducts the white balance control by use of said weighted result of the feature detection.”**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
